Critical context – We Are Ocean, healing, reflecting
Background and Setting
The term culturally sustaining requires that our pedagogies be more than responsive or relevant to the cultural experiences and practices of young people—it requires that they support young people in sustaining the cultural and linguistic competence of their communities while simultaneously offering access to dominant cultural competence.

- Paris, 2012

*Data is based on Fall Cohorts as identified in the data warehouse with cohort code = 'MANA-4'. Cohorts outcomes are then tracked from that point forward. Some students may have earlier enrollments not reflected in this data. Later cohorts require more time for comparative Degree/Certificate completions, as well as 'average number of courses' per student.*
